Profile

OUTLINE Group Office

OUTLINE Group is a full-service engineering firm offering creative and comprehensive architectural finishing and design solutions. A group of skilled engineers and designers work together in the office to meet our clients' needs with the utmost quality and excellence by fusing creativity and professionalism. We provide various services, such as 3D modeling, landscape design, and architectural design for the outside and inside.

Our Mission

To be leaders in architectural design and finishing, contributing to building an integrated and sustainable urban environment that reflects our clients' aspirations.

Our Vision

To be pioneers in architectural design and finishing wherever our work is found, contributing to creating a complete and sustainable urban environment that reflects our clients' aspirations.

Message

We provide integrated engineering services, including exterior and interior architectural design, along with finishing works, focusing on innovation and quality to accurately and professionally achieve our clients' vision.

Objectives

- Innovation and Creativity:

Offering creative architectural and interior designs that reflect each client's unique identity.

- High Quality:

Ensuring the highest quality standards throughout all phases of design and execution.

- Comprehensive Integration:

Providing integrated solutions covering all aspects of architectural design and finishing.

- Sustainable Development:

Adopting sustainable practices and techniques in all aspects of our work.

- Close Collaboration:

Building strong partnerships with clients to ensure their vision and goals are achieved.

Our Values

- Exceptional Creativity:

Providing unique interior architectural designs that reflect the identity and aspirations of clients.

- Quality Execution:

Ensuring projects are executed with the highest levels of accuracy and professionalism.

- Service Integration:

Offering comprehensive solutions that begin with design and end with finishing.

- Sustainable Development:

Adopting the latest sustainable technologies and methods in all areas of work.

- Close Collaboration:

Working closely with clients to achieve their vision and goals.

Our Services

1- 3D Space Design:

We provide high-quality 3D visualizations that allow clients to accurately envision their projects, facilitating informed decisions before construction begins.

2- 3D Modeling:

We develop precise 3D models that reflect architectural and design details, enhancing visual understanding of the designs.

3- Architectural Drafting:

We prepare meticulous architectural drawings and comprehensive plans that support construction and planning processes, ensuring smooth and effective workflow.

4- Construction Supervision:

We offer construction supervision services to ensure that the execution complies with design specifications, committed to quality and professionalism.

5- Home Design:

We design custom homes tailored to the unique needs of clients, integrating functionality and aesthetics in every project.

Office Departments

1. Engineering Design Department

- Exterior Architectural Design:

- Detailed and professional architectural drawings.
- Designing building facades with artistic and creative touches that reflect the architectural identity of the project.
- Preparing detailed plans to ensure accurate execution and easy understanding.
- Creating 3D models allowing clients to visualize their projects realistically before execution.

- Interior Design team:

- Designing interior spaces to be comfortable, practical, and appealing to meet client needs.
- Efficient interior space planning to maximize its usage.
- Careful selection of colors, materials, and furniture to ensure design cohesion and harmony.
- Providing customized design consultations to improve and develop interior spaces.
- Preparing detailed plans to ensure accurate execution and easy understanding.
- Creating 3D models to allow clients to visualize their projects realistically before execution.

- Engineering Supervision and Follow-up:

- Supervising project execution to ensure adherence to designs and technical specifications.
- Providing regular reports and close monitoring to ensure the work progresses systematically and efficiently.

- Urban Planning and Design:

- Developing comprehensive plans to ensure optimal land and space utilization.
- Designing integrated and sustainable urban environments to meet community needs.

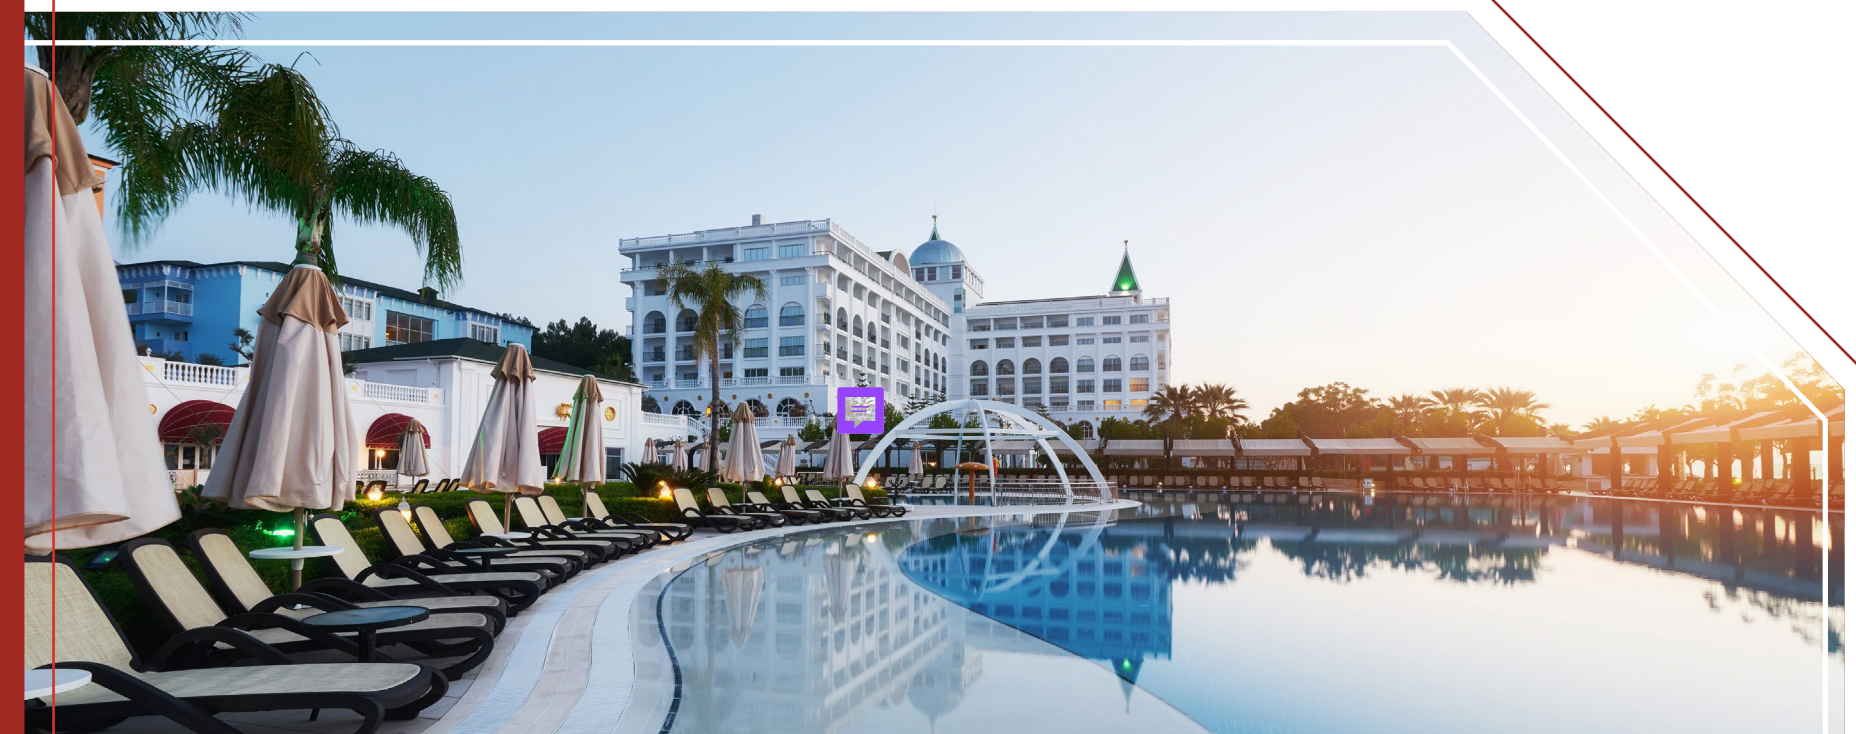

- Landscape Design:

- Creating innovative and attractive landscape designs that enhance the quality of life.
- Providing comprehensive design solutions for outdoor spaces that enhance aesthetics and functionality.

2. Finishing Department

- Project Execution:

- Executing all finishing works for residential and commercial projects according to the highest quality standards.
- Preparing quantity and tender schedules to ensure transparency and accuracy at all stages of the project.
- Monitoring finishing work on-site to ensure contractors adhere to technical specifications and agreed designs.
- Contracting with subcontractors and providing necessary materials for finishing work to ensure the best quality and prices.

Our Achievements

Our portfolio includes a range of outstanding, award-winning projects that have been praised by both our clients and design critics. We are proud of our creativity and achievements that contribute to improving the urban environment and meeting our clients' aspirations.

Our Team

OUTLINE Group consists of a team of elite engineers and designers with extensive experience and innovative vision in architectural and interior design and finishing works. We are committed to turning our client's ideas and dreams into reality, reflecting the highest standards of quality and excellence while maintaining the identity and character of each project.

Our Suppliers

We carefully select suppliers based on the quality of their products and their ability to meet project deadlines and budgets. Our strong relationships with these suppliers allow us to obtain unique, high-quality materials, ensuring that every space we design is unique.

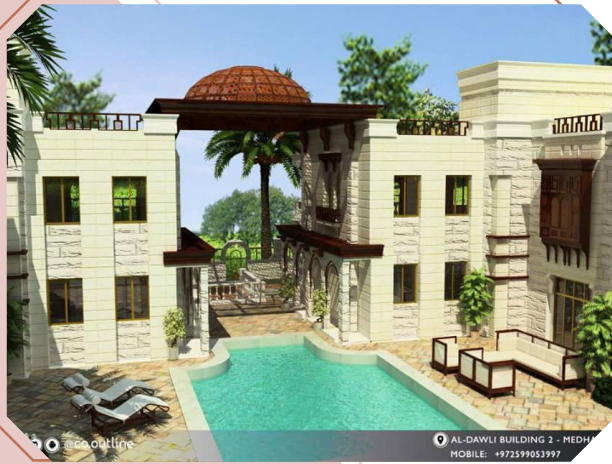

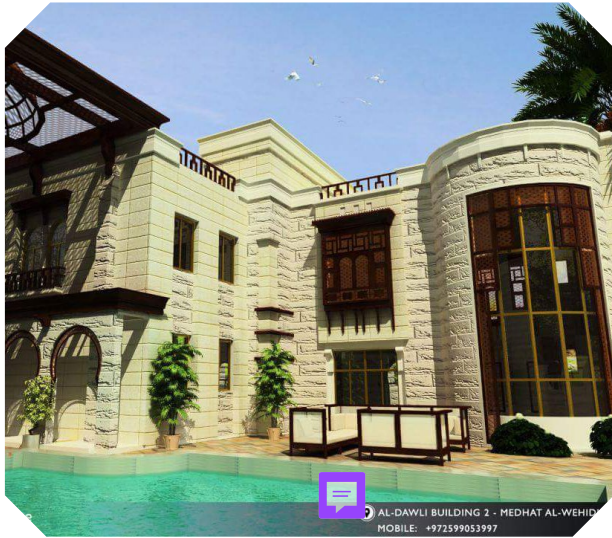

Our Projects

Residential villas
